MINISTRY OF EDUCATION AND TRAINING
NAM CAN THO UNIVERSITY

SOCIALIST REPUBLIC OF VIET NAM
Independence – Freedom - Happiness

UNDERGRADUATE PROGRAM

(Issued together with Decision No. /QĐ-ĐHNCT dated / /2025 of The Rector of Nam Can Tho University)

Name of program : **Architecture**

Level : **Full-time university**

Major : **Architecture**

Code : **7580101**

Type of education : **Regular**

1. Program description

1.1. Introduction to the program

The Architecture program is dedicated to educating and training Architects who possess comprehensive knowledge, essential practical skills, strong ethical principles, professional conduct, and good health, enabling them to contribute effectively to the creation of sustainable and inspiring built environments across various architectural domains. The curriculum integrates theoretical foundations with hands-on projects, fostering creative thinking and collaborative teamwork, and may offer opportunities for specialization in areas such as urban design, building architecture, and interior design.

1.2. General information about the program

Name of program in English	Architecture
Program code	7580101
Degree-granting institution	Nam Can Tho University
Degree	Architect
Level	Undergraduate
The number of required credits	170
Type of education	Regular
Program duration	5 years
Eligible candidates for admission	High school graduates
Grading scale	4
Graduation requirements	- Accumulate a sufficient number of modules and the volume of the training program to

	reach 167 credits; - The cumulative GPA of the whole course is 5.0 or higher (on a scale of 10); - Achieve the required proficiency levels in English and Informatics according to the general regulations of the University; - Meet the required standards for Soft Skills and Vocational Skills; - Possess a certificate of National Defense and Security Education and complete the prerequisite modules.
Job opportunities	-Experts and technicians working at design companies, enterprises operating in the field of construction - design - planning, construction organizations, inspection and construction related companies, architecture construction. - Officials working at agencies, governmental/non-governmental organizations, management, research and appraisal companies related to construction and architecture. - Staff and assistants working at scientific and technical educational and training units related to the field of architecture.
Postgraduate study options	Graduates can pursue Master's degrees domestically or internationally.
Reference program	The undergraduate Architecture training program of the University of Architecture Ho Chi Minh City, the Mien Tay Construction University, and the College of Engineering at Can Tho University.
Update time	04/2025

1.3. Program goals

1.3.1. General goals

PO: The program aims to train Architect graduates equipped with solid professional knowledge, occupational competence, and good health, capable of meeting socio-economic development requirements in the context of national industrialization and modernization; to instill ethical qualities and develop students' capacity for self-study and research to achieve the program's learning outcomes; and to supply human resources capable of working effectively in media agencies,

organizations, and businesses, possessing a progressive spirit and a profound understanding of the field's societal role and position.

1.3.2. Specific goals

PO1: Demonstrate a comprehensive understanding and application of fundamental and specialized architectural knowledge within professional practice**.**

PO2: Cultivate innovative design thinking and generate professional architectural concepts, alongside developing managerial and operational competencies at both individual and collaborative levels.

PO3: Meet the requisite professional proficiencies and essential soft skills for effective communication and interdisciplinary collaboration within a globalized working environment.

PO4: Orchestrate the execution of professional design processes in architectural and construction activities, fostering effective teamwork with allied disciplines to produce high-quality outcomes.

PO5: Establish a capacity for self-directed learning and research within the specialized domain, thereby cultivating corresponding life skills and fostering ethically responsible architects who contribute positively to societal advancement.1.4. Student learning outcomes.

a. Knowledge

PLO1: Apply foundational knowledge of political science, law, social sciences, and public administration to architectural and construction design practices.

PLO2: Achieve the stipulated proficiency in foreign languages and Information Technology as mandated by the Ministry of Education and Training.

PLO3: Integrate specialized and practical knowledge into specific processes within the domain of architectural design.

b. Skills

PLO4: Proficiently execute technical drawings, demonstrate a thorough understanding of design process protocols, and articulate professional requirements within architectural project documentation.

PLO5: Conceptualize and design diverse typologies of residential and industrial architectural projects, exhibiting creativity in independent research and collaborative teamwork.

PLO6: Critically evaluate the efficacy and quality of architectural projects across various design stages and domains.

PLO7: Articulate professional issues in a scholarly manner, and effectively integrate and apply advanced scientific and technological innovations within the architectural design process.

c. Capacity for autonomy and responsibility

PLO8: Demonstrate a commitment to community responsibility and professional ethics in architectural design practice.

PLO9: Cultivate lifelong learning skills, critical thinking, and leadership potential within the field of architectural design.

1.5 Teaching and learning methods/strategies and assessment methods

1.5.1. *Teaching and learning methods/strategies*

The teaching methods are presented in the table below:

Methods and form of teaching	***Purpose***
Presentation	Provide students with a system of basic knowledge of the subject in a scientific and logical way.
Discussion	Through questions and answers between lecturers and students to clarify the knowledge content in the subject.
Assignment	Help students understand and know how to apply the subject content to practical problems.
Self-study, reading of reference materials	Helping learners strengthen their self-study and self-research capacity.

1.5.2. Thang điểm, hình thức, tiêu chí đánh giá và trọng số điểm *(Grading scale, form, assessment criteria, and weight of scores)*

No.	***Form***	***%***	***Assessment criteria***	***Maximum score***
1	*Attendance*	10	- Initiative, level of activity in preparing lessons, participating in activities during class. - Time to attend the compulsory session.	10
2	*Indididual assignment*	15	According to the answers, the teacher's scale.	10
3	*Progress assessment*	15	According to the answers, the teacher's scale.	10
4	*Final exam*	60	According to the answers, the teacher's scale.	10

2. Program duration*:* 4 years

3. Required total credits

Required total credits: 170 credits (excluding the Physical Education and Defense and security education courses), distributed as follows:

KNOWLEDGE	*Obligatory knowledge*	*Elective knowledge*	*Total*
General knowledge	**35**	**0**	**35**
Professional knowledge	**87**	**45**	**135**
Fundamental knowledge	35	2	37
Specialized knowledge	51	35	86
Graduation internship	4	-	4
Graduation project/Alternative courses		8	8
Total	**124**	**47**	**170**

4. Eligible candidates for admission

Admission is based on the results of the national high school graduation exam or the transcript of the learning process at the high school level according to a combination of subjects by discipline and admission nationwide.

5. Curriculum, graduation requirements

5.1. Curriculum

Implement the regulation on full-time university and college training according to the current credit system and training regulations of Nam Can Tho University.

5.2. Graduation requirements

Students who complete the training program are considered for graduation and recognized for graduation according to Article 27 of the regulation on training according to the credit system.

Achieve English and Informatics proficiency according to the general regulations of the University and the Ministry of Education and Training

Obtained the certificate of National Defense and Security Education; Physical education; Soft Skills and Vocational Skills.

Assessment of departmental grades and module grades shall comply with the University's training regulations.

The ranking of the school year and graduation ranking shall be carried out in accordance with the training regulations of the University.

6. Program structure

4	(Capstone Project - Architecture)		6	180		180	TC
	Total		**12**				

(*)Prerequisite courses, not included in the cumulative GPA calculation
(**) If students do not meet the requirements to complete their graduation thesis, they will take alternative courses
BB: Compulsory
TC: Elective

8. Guidelines for Program Implementation

8.1 Faculties and departments

- The responsible Faculty/Department shall review and oversee the compilation of detailed module outlines for foundational discipline, core discipline, and specialized knowledge blocks according to this program's credit structure. Provide a list of textbooks, course materials, and references of all modules to the University's Library and keep them at the Faculty Office. At the beginning of each semester, coordinate with the units of the University to implement the training plan on schedule.

- Assign lecturers with a master's degree or higher (in the same discipline or related major) to teach theoretical modules, provide detailed outlines of modules to lecturers to ensure that they are in accordance with the general teaching plan of the University.

- Academic advisors must thoroughly understand the entire training program

according to the credit system to guide students to register for modules.

8.2 Lecturers

- Lecturers assigned to teach need to carefully study the content of the module outline to prepare lectures and appropriate teaching materials and supplies.

- Must fully prepare lectures, textbooks, learning materials and provide them to students to prepare before going to class.

- Organizing seminars, focusing on organizing group learning and guiding students in writing essays, completing projects, giving in-class presentations; facilitate discussions, problem-solving sessions in class and labs; and guide students in writing reflective reports/summaries.

- Pay attention to the development of students' ability to self-study and self-research throughout the teaching process and guide internships and practices.

8.3 Students

- Students should consult with their academic advisor to select modules in accordance with their progress. Students should study the lesson on their own before going to class to easily absorb the lecture. It is necessary to ensure sufficient time to go to class to listen to the lecturer's lecture instructions.

- Self-discipline in self-study and self-research, and actively participate in group learning, fully attend seminars. Proactively and actively exploit resources on the Internet and in the university's library to serve self-study, self-research and graduation projects. Strictly adhere to regulations regarding examinations, tests, and assessments.

- Regularly participate in student organization activities, cultural, sports, and artistic events to practice communication skills, understanding society and people.

8.4 Facilities and equipment for teaching, practice, and internships

- Lecture rooms with traditional equipment, equipped with additional teaching support tools (projector).

- Computer laboratories are equipped with software for basic informatics training. Specialized Multimedia Communication labs/studios are equipped with appropriate machines, equipment and tools.
